LIPOSUCTION GARMENTS

*"From within, a majestic and beautiful goddess stepped, and
all around grass grew beneath her slender feet. Aphrodite"
(Theogonia)*

With the strings above, Hesiodos speaks of beautiful goddess who is sprouting with lush green grass and flowers, where she has stood out, born from the foaming waves of the sea. The beautiful Aphrodite shimmers like gold and leaves herself amazed for everyone. She is more beautiful than beautiful and more gold than gold. And the one who wears the bright magical gown of goddess like silver just look like her, and it glares the all eyes of the ones who look at.

Aurafix, with nearly 20 years of experience in the medical sector and technology to offer you with liposuction clothes. Inspired by the clear and unique beauty of jasmine flower, the liposuction clothes provide a perfect fit for your body.

Auralipo, a special fabric produced by Silver Ion Technology, rapidly improves the operation areas, while the stretchable, flexible structure of our clothes gives your body the value it deserves with all its freshness and softness.

Aurafix Liposuction clothes will fit your body tightly with a jasmine sensitivity and take its shape. In the meantime, you will experience the goddess's magic garment experience and you will discover your beauty..

It's your shape..

TSD manufactures orthopedic ready to use products which conform with regulations & legal requirements and demands of customers along with latest technology and employees experience & knowledge.

TSD consistently improves all the processes which effects the high product quality that furnishes features such as esthetic, choice, functionality and endurance.

TSD ensures customer satisfaction by quality products, on time delivery along with supporting customer services before and after sales.

TSD aims at being a leader establishment in its sector by evaluating human resources and backing up employees proficiency with trainings.

In terms of quality and continuous improvement, all the managing staff and employees of TSD actively perform a duty for achieving the common goal in line with company objectives.

We have been creating value for the medical sector for 16 years with the brands we have established under the roof of TSD Health Products.

We carry on a business in nearly 50 countries and we share our experiences with our patients about orthopedic ready to use products, orthosis, prosthesis, compression and products after liposuction.

Health requires care and attention and does not accept faults. With this awareness, we are performing our business with care and passion, we closely follow the innovations in the sector

We offer the fastest and most reliable solution to the needs of our patients with our corporate approach that we maintain without compromising our traditions. Today, with all our colleagues under the roof of Aurafix, we are aware of the seriousness of our work and stay the course towards our goals without compromising our principles.

The continuous rise of Aurafix and this sample success are being built in cooperation with our colleagues, patients, dealers, doctors and physiotherapists and we continue to grow.

LC-1505 Hip Fat Transfer Thigh High Compression Corset

Compression garment used after hip fat transfer operations. It accelerates blood circulation due to its compressive effect. The garment is made of double-layered elastic fabric for operation zones. The fabric in the hip area provides minimal compression to the hips with its thin and flexible structure while providing more rigid compression in the operation area with double-layer fabric support. For easy wear and fixing, it has adjustable hook-and-eye system on the front.

Back / Abdominal Below Knee Breast Open Post-Op. Compression Corset (with Zipper)

Compression garment used after abdominal, hip, back and ankle body area operations. It accelerates blood circulation with its compression effect. Auralipo fabric provides more rigid and body-fit compression with double fabric support in the operation area. Side zipper system makes it easy to wear the product. Reinforced fabric and suture technology are provided to support the body in anatomical posture. Adjustable shoulder straps prevent improper position of the corset.

LC-1541 Post-Op. Abdomen / Waist Shaper Corset

It is used after abdominal stretching and liposuction operations in the abdomen, groin and back section. It accelerates blood circulation with its compression effect. Double-layer liposuction fabric support provides more rigid compression to fit body form. Thanks to the 3-clutch system, it helps correct treatment by ensuring that the compression of the product is adjusted appropriately during the treatment period. Reinforced fabric and sewing technology are provided to support the body in an anatomical position.

Post-Op. Bra with Bandage

It is used after breast augmentation and reduction operations. It is made of double-layered soft, flexible fabric. It has 3-clasping structure from the front. Adjustable shoulder and clasp support under the chest helps to wear the product easily. Extra 7 cm bandage support on the chest used after the operation fixes the implant. It has a hook and loop strap that can be adjusted to provide better compression to the breast area.

Breast Prosthesis Bra

It is specially manufactured for breast prosthesis use. In the cup section, the pockets where the prosthesis can be placed provide comfortable use by fixing the prosthesis. Pockets in both cup regions allow the use of the prosthesis to be left and right. The inner surface is made of cotton fabric that does not irritate the skin. Shoulder straps are softened for comfortable use. Comfort and stylish appearance enhance the feeling of confidence.

Ear Protective Bandage

An ear bandage manufactured from neoprene material, provides ear protection after otoplastic surgery, helps to accelerate the healing process by protecting the operation area from external influences. Due to the special material, sound waves are not blocked in the protection zone and do not cause hearing loss during treatment. Maximum comfort is provided with extra protection sponges which can be attached to the inner side with velcro. The bandage can be adjusted with adjustable velcro.

• Does not cause hearing problems, since the part coming to the ear section does not effects the sound waves

• With pad support, provides compression to the surgical area
