AURAFIX
HEALTH PRODUCTS
DIŞ TİC. VE SAN. A.Ş.

Aurafix, started its journey by taking an active role in the retail sector in 2004, reflected its experiences in the wholesale sector in 2007. Aurafix, which made its first export in 2009, has been continuing to take firm steps forward. Aurafix is a brand that continues to improve itself thanks to creating value for people, aiming for people of all ages to lead an active life, leading the sector with innovative products, and with an innovative perspective. As Aurafix, we work with all our strength to create a brand that fixes its spirit to the energy of time.

Our primary goal is to make the business partnership valuable by meeting the demands and expectations of our customers. Aurafix is a brand with a modern structure, planning its future. We are on our way to becoming a global company with our commitment to technology, quality service policies and advanced products. Today, we have touched people of all ages thanks to the great Aurafix family with our representatives and business partners all over the world.

Aurafix directs both the future and the present with its expert staff by using human skills at the highest level. It tops success off in the field of soft-rigid orthoses, compression stockings, liposuction corsets and rehabilitation products with world-class certificates (ISO 13485 and ISO 9001).

Our policy based on the needs and demands of our customers has been our biggest assistance for today's AURAFIX family. Thanks to the positive energy of our team, by women majority, we continue to work with all our strength to always produce better.

OBJECTIVE

We aim to be one of the world's leading companies in our sector by producing innovative products that prioritize human health, aesthetically eye-pleasing.

VISION

Aurafix, having an innovative and dynamic structure, produces products by always prioritizing technology. Aurafix primarily produces functional, aesthetic products that do not affect your daily life.

Aurafix, which updates its product range to keep up with the times, is one of the leading companies in the health sector. Aurafix continues to improve its products and itself with this perspective.

MISSION

The service we offer shows that we believe that every single person has the right to use high quality medical products. As Aurafix, we have been working to produce durable, quality, healthy and life-enhancing products by the knowledge we have gained from our experience to forward the Aurafix family.

QUALITY POLICY

- Aurafix manufactures products suitable for the end user in accordance with legislation, legal requirements and customer demands along with latest technology and employees' experience and knowledge.
- Aurafix continuously ensures all processes that keep high product quality at the same level at all times by ensuring the characteristics of aesthetics, choice, functionality and durability.
- Aurafix ensures the satisfaction of people of all ages with quality products, timely delivery, pre and post sales customer service.
- Aurafix aims to be a leading organization in its sector by evaluating its human resources and backing up of its employees with trainings.

CORSET USAGE TIME

Produced with antibacterial fabric technology, Auralipo provides rapid healing of the operation areas and has a durable and flexible structure at the same time. Aurafix compression garments used after liposuction operations are produced with the latest seamless technology. These garments are called corsets according to the body parts and with their seamless structure, they do not leave marks on the areas they compress and offer an extremely comfortable experience in terms of use. Corsets made of Auralipo fabric are used for compression after aesthetic and liposuction operations. These corsets are used for approximately 4 to 8 weeks depending on the amount of fat tissue removed and the characteristics of the person. The duration of use varies according to the amount of fat removed from areas such as face, chest, abdomen, arms, hips and legs.

LC-1500

ABDOMINAL/OVER KNEE POST-OP. COMPRESSION CORSET

It is a compression garment made of Auralipo fabric which is used after liposuction operations in abdominal and hip body areas. Auralipo fabric provides compression for 8 weeks with its 5 fold resistance feature. Produced with semi seamless technology, the corset covers the body like a second skin. The hooks used in the 3-clasp system allow easy putting on and taking off. Besides, hooks that increase the resistance of the corsets with 3 stages provide a personalized experience in compression.

Indications

1. For compression purposes after abdominal and hip liposuction operations.

Thigh Measure from the thickest part of the upper leg.

Waist Measure just above the belly button.

Hip Measure where the hips are most swollen.

COLOUR

The straps used in the 3-clasp system can be easily put on and taken off as the edema decreases. It is resistant to all kinds of pressure.

Agraft in the closed genital area provides ease of use.

Hangar locations are interchangeable.

The corset produced with seamless technology covers the body like a skin.

ABDOMINAL / HIP POST-OP. COMPRESSION CORSET

It is a compression garment made of Auralipo fabric used after fat removal operations in the abdomen, buttocks, waist and back areas. Auralipo fabric provides compression for 8 weeks with its 5-fold resistance. The 3-clasp system allows for easy putting on and taking off. Besides, the hooks that increase the resistance of the corsets with 3 stages provide a personalized experience in compression. Since the width of the straps used expands the compression surface area, the carrying durability is at a high level.

Indications

1. For compression purposes after abdominal and hip liposuction operations.
2. For compression purposes after bariatric surgery (obesity).

FULL BODY POST-OP. COMPRESSION CORSET SLEEVELESS

It is a compression garment made of Auralipo fabric used after fat removal operations on buttocks, breasts, abdomen, thighs, knees and all body parts. Auralipo fabric provides compression for 8 weeks with its 5-fold resistance. The 3-clasp system allows for easy putting on and taking off. Besides, the hooks that increase the resistance of the corsets with 3 stages provide a personalized experience in compression.

Indications

1. For compression purposes after breast, buttock and full body liposuction operations.
2. For compression purposes after bariatric surgery (obesity).

ABDOMINAL / HIP POST-OP. COMPRESSION CORSET

It is a compression garment made of Auralipo fabric used after fat removal operations in the abdomen, buttocks, waist and back areas. Auralipo fabric provides compression for 8 weeks with its 5-fold resistance. Produced with seamless technology, the corset wraps the body like a skin. The 3-clasp system allows for easy putting on and taking off. Besides, the hooks that increase the resistance of the corsets with 3 stages provide a personalized experience in compression. The velcro system used offers the patient the highest comfort for shoulder carrying.

Indications

1. For compression purposes after abdominal and hip liposuction operations.
2. For compression purposes after bariatric surgery (obesity).

WOMAN POST-OP. COMPRESSION

It is a compression garment made of Auralipo fabric used after fat removal operations in the shoulder and arm areas. Auralipo fabric provides compression for 8 weeks with its 5-fold resistance. The 3-clasp system allows for easy putting on and taking off. Besides, the hooks that increase the resistance of the corset with 3 stages provide a personalized experience in compression.

Indications

1 After arm fat removal operations is used.

CHEST BAND

Bands produced with the use of special fabrics are used after gynecomastia operations in men. These bands provide comfort for long-term use after the operation and support the healing process by providing support to the operation area.

LC-2030**THORAX BAND (15 CM)**

It is a chest corset after gynecomastia operations. Made of supportive elastic cotton fabric, the dressing reduces the risk of trauma in the operation area. Thanks to its flexibility, it reduces postoperative edema by applying equal compression to each area.

**Indications**

1. After gynecomastia operations is used.

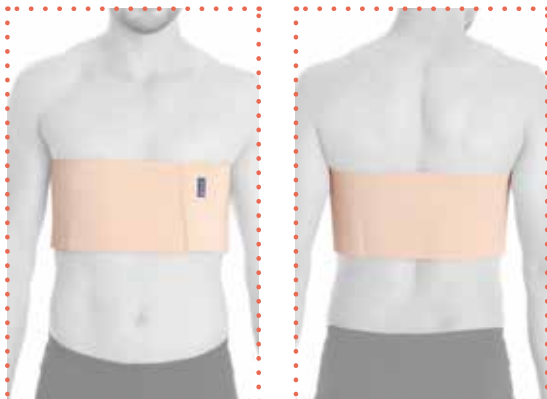

SIZE
CHART

S	70 - 90 cm 27 ⁹ / ₁₆ - 35 ⁷ / ₁₆ in
M	90 - 110 cm 35 ⁷ / ₁₆ - 43 ⁵ / ₁₆ in
L	110 - 130 cm 43 ⁵ / ₁₆ - 51 ³ / ₁₆ in
XL	130 - 150 cm 51 ³ / ₁₆ - 59 ¹ / ₁₆ in

Chest Take the circumference measurement from the middle of the chest.

COLOUR

Adjustable velcro system.

Maximum compression support

**LC-2045****HIP PROSTHESIS SITTING
PILLOW POLYURETHANE
(GLUTEAL IMPLANT)**

It is a sitting pillow made of polyurethane material used after hip surgery. The product used after hip prosthesis (GLUTUEL IMPLANT) surgery provides a more comfortable sitting. It can be easily use on chairs and sofas and carry with it.

**LC-2046****HIP PROSTHESIS SITTING
PILLOW VISCO (GLUTEAL
IMPLANT)**

It is a sitting pillow made of visco material used after hip surgery. The product used after hip prosthesis (GLUTUEL IMPLANT) surgery provides a more comfortable sitting. It can be easily use on chairs and sofas and carry with it.

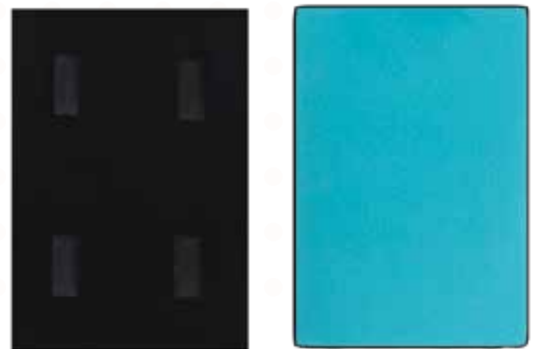

LC-2047 DRAIN SET

It is a drain set made of Auralipo fabric. Auralipo fabric carries the drain sets safely with its resistant and robust structure. Provides patient comfort with seamless technology.

LC-2048 COMPRESSION PADS

It is a compression pad designed as 4 pieces in an (21cm*29,5cm)A4 size package. The pads can be easily cut with scissors and can be used wherever extra compression is required. The skin contact surface is antibacterial and antiallergic. The pads placed between the corset and the skin provide a comfortable use for putting on and taking off.

AURA LIPO

Produced with antibacterial fabric technology, AURA LIPO provides rapid healing of the operation areas. Additionally, it has a durable and flexible structure.

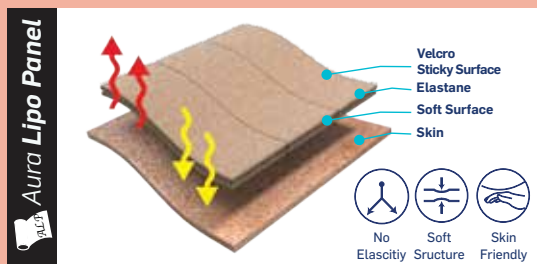

AURA LIPO COTTON

It provides a soft and full grip due to its cotton structure produced with antibacterial fabric technology. It provides ease of use with its skin friendly and antiallergic feature.

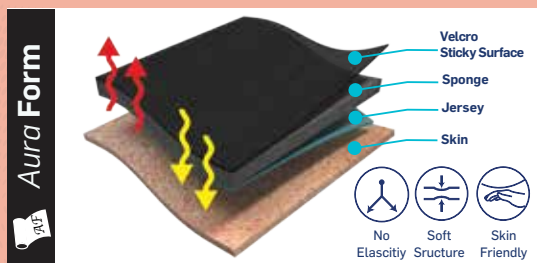

AURA SOFT

AURA SOFT is a special woven fabric that provides maximum adaptation to the area where it is used with its flexible structure. Thanks to the special weaving of the skin contact surface, it increases the ease of use and comfort of the patient.

AURA LIPO PANEL

AURA LIPO PANEL, which has a flexible and resistant structure, provides complete compression in abdominal area operations.

AURA FORM

AURA FORM is a sponge material between the velcro adhesive surface and sweat absorbing jersey surface. The high-density sponge fabric provides the desired stabilization by wrapping the body.

AURALIPO TECHNOLOGY

It is a compression garment made of Auralipo fabric used after fat removal operations in the abdomen, hips and back body areas. Auralipo fabric provides effective compression for 8 weeks with its 5-fold resistance. Produced with antibacterial fabric technology, Auralipo ensures rapid healing of the operation areas. It also has a durable and flexible structure. It has been proven by (SGS) tests conducted in international laboratories. Thanks to the technology used, it allows longer use without deforming thanks to its fabric structure compared to its competitors.
